

Merit[®] heat pumps come appointed with:

Precision-balanced, direct drive fan to keep the noise low and the savings high

Reinforced with a PermaGuard™ cabinet for long-lasting protection against rust and corrosion

Cabinets built using superior materials and proprietary designs make Lennox® units more durable, safer and easier to install

Fan and blades enhance air circulation and decrease noise from the unit

Dual-fuel compatible with Lennox furnaces for added cost savings

	High-Efficiency, Two-Stage Heat Pump 16HPX	High-Efficiency, Single-Stage Heat Pump ML16XP1	Standard-Efficiency, Single-Stage Heat Pump ML14XP1

Seasonal Energy Efficiency Ratio (SEER)

This rating determines a heat pump's efficiency. The higher the SEER rating, the more energy-efficient it is.

Heating Seasonal Performance Factor (HSPF)

A heating efficiency rating for heat pumps. A higher-rated HSPF heat pump will result in less energy use and increased energy savings over the life of the system.

Dual-Fuel Compatibility

An HVAC system that pairs an electric heat pump with a gas furnace and alternates between the two fuel sources to maximize comfort and efficiency.

ENERGY STAR® Certified

HVAC equipment with the ENERGY STAR label meets or exceeds federal guidelines for energy-efficient performance.

Quantum Coil™

Our exclusive coil is made from a proprietary aluminum alloy for improved resistance to corrosion, resulting in improved performance and energy savings.

5-Year Limited Warranty on Covered Components

Covered components may be eligible to receive a 10-year warranty. Online equipment registration at lennoxregistration.com is required within 60 days of installation (except in California and Quebec) or Lennox' base warranty will apply. Applies to residential applications only. See actual warranty certificate for details.

How does single-stage, two-stage & variable-capacity work?

72° Single-Stage

Unit is either on or off, creating wide temperature swings.

72° Two-Stage

Unit runs at either low or high speed, using the lower speed 80% of the time.

72° Variable-Capacity

Unit runs at low most of the time, using only the amount of energy necessary to meet comfort need.
