

When everything
is perfect,
you can feel it.

Presenting the Ultimate Comfort System.

Combining the very best of the Dave Lennox *Signature*® Collection, the Ultimate Comfort System is the very top of top-tier, offering unprecedented whole-home system comfort that's perfectly tuned to your home. From the moment it's installed, this intelligent system seamlessly works together to deliver clean, perfect air and maintain optimal performance. This is nothing short of the most advanced, efficient and capable heating and air conditioning system the world has ever seen. This is perfect air fully realized.

Air is life. Make it perfect.™

- 1 PureAir™ S Air Purification System
- 2 iHarmony® Zoning System
- 3 Lennox S30 Smart Thermostat
- 4 SL28XCV Air Conditioner/ SL25XPV Heat Pump
- 5 SLP99V Gas Furnace

Consistently perfect.

Forget temperature swings and having the weather dictate humidity. This variable-capacity system delivers clean, perfect air and maintains your home's ideal temperature and humidity level with pinpoint accuracy. Period. And with iHarmony zoning, you can optimize and personalize your air throughout different sections of your home. That way, the only way your air feels is how you want it to feel.

Beyond quiet.

Hear that? Of course you didn't. Even with all of its impressive power, this system has been engineered to drastically minimize sound output to seamlessly operate at a noise level that is, quite simply, unheard of.

Cleaner, healthier air.

The quality of our indoor air has taken on more importance than ever. The PureAir S offers unmatched whole-home air purification. It's the hospital-grade¹ filtration system with a filter that removes from the air² over 99.9% of the virus that causes COVID-19³ (and even viruses up to 4 times smaller). It effectively removes dust, pollen, mold spores, dander, germs, odors, and chemical vapors (including health-affecting volatile organic compounds). And it produces zero ozone, unlike other systems.

1. Not intended for actual hospital use. Based on Application Guidelines, Table 1, ASHRAE Application Handbook, 2011.
2. Removal efficiency based on third party testing results using MS-2 bacteriophage (ATCC 15597-B1). Bacteria representative of virus-sized particles like SARS-CoV-2, the virus that causes COVID-19. November 2020.
3. When used properly with other best practices recommended by CDC and others, filtration can be part of a plan to reduce the potential for airborne transmission of COVID-19 indoors.

Unmatched efficiency.

More efficient than any system ever. Including a standard-setting furnace that boasts a 99% efficiency rating—that means it essentially converts every last bit of energy it uses into heating and cooling the home—and an air conditioner that achieves an efficiency rating of up to 28 SEER. Best of all, the energy saved is as healthy for your wallet as it is for the environment.

The air conditioner has been designated as a Most Efficient ENERGY STAR® certified product in 2022. This certification recognizes products that prevent greenhouse gas emissions by meeting rigorous energy efficiency performance levels set by the U.S. Environmental Protection Agency.

Complete control.

The Lennox S30 Smart Thermostat unlocks the full potential of the Ultimate Comfort System. It effortlessly integrates with voice-automated devices and premium smart home systems. Best of all, it acts as the command center for your system, with the incredible ability to monitor sensors in all of your equipment to react, diagnose and notify you if your system goes out of tune. For added assurance, it can even allow for remote troubleshooting of issues. This is more than a mere temperature regulator—this is a pathway to perfect air.
