**ELITE**® SERIES

**EL195**

High-efficiency,  
single-stage  
furnace

# An efficient furnace that envelops you in warmth.

Stay warm for less with the Lennox Elite Series® EL195 gas furnace. Energy ratings of 95% AFUE (Annual Fuel Utilization Efficiency) mean you can enjoy a significant reduction in utility costs. In addition to energy savings, you can take comfort in features that keep your air feeling cozy, no matter what the weather's like outside.

And, not only will you pocket hundreds of dollars in annual savings without sacrificing comfort, you'll also enjoy better air quality and exceptional warmth from a continuous low-speed fan operation that slowly circulates the air in your home. What's more, the fan increases the effectiveness of your filters, allowing them to capture and remove more pollutants from indoor air.

## As reliable as it is efficient

Every component of the EL195 is rigorously tested in our dedicated research lab. As a result, you can count on your new furnace to deliver the highest possible levels of reliability and performance.

## Peace of mind

The EL195 comes with a limited lifetime warranty on the heat exchanger and a 5-year limited warranty on all remaining covered components.\*

## Money-saving energy efficiency

With efficiency ratings of 95% AFUE, the EL195 can save you hundreds of dollars each year on utility bills, compared to older and standard-efficiency furnaces. The EL195 may also qualify for local incentives and rebates.

AFUE stands for "Annual Fuel Utilization Efficiency" and is a measure of a furnace's efficiency and performance. Like the miles-per-gallon rating on your car, the higher the AFUE rating, the lower your fuel costs. Typical furnace ratings range from 80% to 95%.

This chart depicts potential energy savings you can expect from the EL195 furnace, versus older furnaces with lower efficiency ratings. Criteria used in this example are 2,000 full-load heating hours, with a 60,000 Btuh heating design load and \$1.368 ccf for gas. Your actual savings may vary, depending on the weather patterns in your local area, local fuel rates and your individual lifestyle.

*Delivering energy savings and efficient* **comfort**

### The ideal balance of comfort and efficiency

When paired with a Lennox® electric heat pump, the EL195 gas furnace **offers even greater efficiency**. An all-in-one heating and cooling system, the heat pump provides money-saving warming and cooling on mild days. On extremely cold days, the gas furnace takes over to provide the extra power you need to stay warm. That means you can enjoy cost-efficient comfort in any season.

The EL195 may be eligible for federal, state or local tax credits, as well as rebate programs from local utilities. Please consult your tax advisor for more information.

The EL195 has earned the ENERGY STAR® label, which means it meets or exceeds guidelines set forth by the U.S. Environmental Protection Agency.

Choosing an ENERGY STAR® qualified product like the EL195 can improve your comfort, while also helping you save energy and money. For other ways to make your home more efficient, visit [ItPaysToLiveSmart.com](http://ItPaysToLiveSmart.com).

## Elite® Series EL195

**Duralok Plus® Heat Exchanger** – Made of high-quality, patented ArmorTuf™ aluminized steel. Life-tested in excess of industry standards for long product life and durability.

**Patent-Pending Burner Box Design** – Provides an additional layer of steel in front of combustion.

**SureLight® Igniter** – Nitride design provides long product life and reliable operation.

**Stainless Steel Secondary Heat Exchanger** – Improves efficiency by capturing additional heat.

**Continuous Low-Speed Fan** – Slowly circulates air for improved comfort and air quality.

**SureLight® Control Board** – Ensures reliable and efficient operation.

**Durable Steel Cabinet** – Made to last with an attractive, high-quality, textured-paint finish.

**Sealed Blower Compartment** – Minimizes losses and maximizes comfort and efficiency.
